... a bridge from Friesland to Hungary, from Frisian Lexicography to Dictionary Portals ...
Internet is a source of inspiration for lexicographers and a challenge:

- to give users easier access to scholarly dictionaries and to bridge the gap between the general public and scholarly dictionaries;
- to develop a common approach to e-lexicography that forms the basis for a new type of lexicography that fully embraces the pan-European nature of much of the vocabularies of the languages spoken in Europe.
• wg1: integrated interface to European dictionary content
• wg2: retro-digitized dictionaries
• wg3: innovative e-dictionaries
• wg4: lexicography and lexicology from a pan-European perspective
WG1: INTEGRATED INTERFACE TO EUROPEAN DICTIONARY CONTENT

The first working group will investigate how authoritative dictionary information on the languages of Europe can be made accessible to both the general and academic public. It will:

- set up a European dictionary portal, which will give information on scholarly dictionaries of the languages of Europe and provide access to these dictionaries;
- investigate the possibilities of interlinking the contents of European dictionaries;
- investigate user requirements with respect to the presentation of dictionary content;
- investigate the possible involvement of users in the creation of dictionary content.

dictionary portal:

Definition: ‘The only conditions are that the portal is accessed via a computer screen, that it provides access to more than one dictionary, and that the integrated dictionaries can still be accessed as standalone products.’
